| Proposal Text (attach additional pages as necessary; for bylaw, P&P, or other amendments of existing provisions, show changes with added words underlined, and deleted words with a line through them): Update to the Central Division Certified manual - See attached | | |
| Proposal Explanation and Justification (attach additional pages as necessary): The Low Angle Rescue (LAR) section of the Central Division Certified currently refers to lowering and raising a toboggan/litter using a 3:1 mechanical advantage. This should only be used for raising and is inconsistent with general practices in the field. All references to lowering have been deleted. LAR is covered extensively in the NSP MTR program. The current MTR manual (2012) incorporates the proper and current methods, drawings and photographs. The MTR program is the reference and training guide for LAR. The 2012 MTR manual has been listed as a reference. | | |
