

SENIOR TELEMARCK

Performance Evaluation Sign Off Sheet

Date: ___ / ___ / ___

SCORING	
1	Essential elements were not observed or were not present
2	Essential elements are beginning to appear but not at a Senior level
3	Essential elements appear but are not consistently at Senior level
4	Essential elements appear regularly at Senior level
5	Essential elements appear frequently above a Senior level
6	Essential elements appear consistently at a Superior level

Risk Management: All those involved will communicate any concerns regarding risk management. Strict efforts must be made to ensure the safety of all participants & the public.	
Reference (not scored): PSIA Fundamentals for Telemark Skiing – All skiing below is a blend of the fundamentals	
Control the fore/aft relationship of CoM to the base of support to manage pressure along the length of the skis	CANDIDATE NAME
Control the lateral relationship of the CoM to the base of support to manage pressure from ski to ski	
Control edge angles through a combination of inclination and angulation	
Control the turning of the skis with rotation of the feet and legs with discipline in the upper body	
Regulate the magnitude of pressure created through ski/snow interaction with flexion and extension	
Control the size, duration, rate, and timing of the lead change to manage fore/aft stability	

GROOMED SLOPE PERFORMANCE – Visual Cues – What Do You See?	Instructor	Initials	Date
a. Connected and rounded turn shapes of varying sizes – maintaining consistent speed and control			
b. Simultaneous foot tipping at initiation – carving & skidding acceptable – both feet in contact with snow			
c. Skis parallel at initiation - convergence during turn acceptable			
d. Consistently turns the skis separate from a stable upper body			
e. Control edge angles through a combination of inclination and angulation			
f. Continuous movement of both feet to produce a lead change at or near the apex of the turn			

STEEP SLOPE PERFORMANCE – Visual Cues – What Do You See?	Instructor	Initials	Date
a. Rounded and connected shorter radius turns for a controlled and consistent fall line descent			
b. Pole touch/plant aids in stabilization and timing			
c. Skis parallel at initiation - convergence during turn acceptable			
d. Simultaneous foot tipping at initiation – carving and skidding throughout the turns is acceptable			
e. Edging achieved through inclination and angulation			
f. Skier uses a rate of lead change that complements the turn			

MOGUL/UNGROOMED SLOPE PERFORMANCE – Visual Cues – What Do You See?	Instructor	Initials	Date
a. Connected turns for controlled fall line descent - consistent rate of descent			
b. Pole touch/plant aids in stabilization and timing			
c. Skis turn under stable upper body			
d. Rotary movements of the legs, as required, to navigate mogul or ungroomed terrain			
e. Pressure regulation/absorption with flexion and extension to maintain contact with the snow			
f. Timing and intensity of the lead change are appropriate for the terrain			

COMMENTS:

Sign-offs must be from a current OET TE (2024/25) or current, calibrated Ski/Ride TE (2023/24)

All Sign-Offs Must be completed on Senior Level Terrain

(rev. 12/11/2023)
